

# PRESS RELEASE

## **M<sup>2</sup> Polymer Technologies, Inc. Attains ISO 9001 Certification**

June 7, 2011 (West Dundee, Illinois)

M<sup>2</sup> Polymer Technologies, Inc. has been assessed and approved by QAS International to the ISO 9001:2008 management systems, standards and guidelines and have been issued an ISO registration certificate.

M<sup>2</sup> Polymer Technologies, Inc. was established in January of 2000 and offers over eleven years experience in Super Absorbent Polymers ("SAP") and specialty chemicals. They are an environmental industry expert in the use of super absorbent polymers for solidification and stabilization of industrial and hazardous wastes. "SAP" are a class of cross-linked, non-biodegradable polymers capable of absorbing and retaining up to 500 times their weight in water. Super Absorbent Polymers are widely used to solidify a wide variety of aqueous wastewaters and sludge with nominal or negligible increase in waste volume or weight.

M<sup>2</sup> Polymer Technologies, Inc. is widely known for their **Waste Lock**<sup>®</sup> brand of Superabsorbent Polymer products which are widely used in the environmental industry to treat many types of waste.

Waste streams that benefit from the **Waste Lock**<sup>®</sup> Super Absorbent Polymer technology includes:

- Low Level Radioactive Waste (LLRW)
- Metal Plating Waste
- Superfund and FUSRAP Site Wastes
- Nuclear Power Plant Waste
- Sludge with Heavy Metals
- Medical Waste & Bodily Fluids
- Unused Latex Paint Waste
