

HMCS-101

Heavy Metal Cleaning Solution

HMCS-101 is a solution designed to clean Heavy Metals (except Mercury) from concrete, masonry products, metal surfaces and pipes.

Product Attributes:

Environmentally Safe
Solvent Free

Water Soluble
Biodegradable

Product Facts:

Each application of HMCS-101 achieves an average reduction of 85% removal of Heavy Metal contamination with a residence time of 30 minutes.

It will clean to a 1/8" depth on solid surface concrete and up to 1" on a porous surface with a one-hour residence time.

1. Remove all debris from the surface to be cleaned.
2. Apply **HMCS-101** by spraying or painting. Ensure thorough product contact with the surface to be cleaned.
3. If possible, surface should then be brushed to agitate product and to enhance cleaning.
4. Allow product contact time of minimum 15 minutes. For highly contaminated surfaces or where Mercury sludge exists, allow a contact time of minimum 30 minutes. For subsurface cleaning, allow one (1) hour contact time.
5. **HMCS-101** can be removed with high-pressure steam or water followed by wet-vacuum cleanup or wiping with absorbent cloths. If not possible, simply clean by applying water and vacuuming or wiping with absorbent cloths.
6. Effluent should be collected and disposed of in accordance with State or Federal regulations.
7. If more than one application is needed, repeat Steps 1 through 6.
